Integrate or separate by UDP port?

Do you integrate all BACnet devices on your network or do you separate them by UDP port? If you separate them, what is separated? By service? By vendor? By building?

ABOUT THIS GROUP

Colleges and Universities around the world have huge multi-vendor BACnet networks and many similar challenges. This group is a space to collaborate, share wins, and discuss challenges. Ask as many questions as you like, and provide your own success stories that we can learn from!

Proposed Agenda

- [2 mins] Intro. Who am I and Who is Optigo Networks
 - Agenda.
- [5 mins] Industry trends
 - I'll give a glimpse to the few growing trends that we have been observing*
 - The Internet of Things: Bye bye homogeneity. Welcome mixture of the Bests.
 - Maintenance is becoming most expensive piece of building life
- [15 mins] Visual BACnet: high quality BACnet systems at lower setup and maintenance costs
 - This part will be more "sales" and I'll introduce Visual BACnet. I'll do a demo and show how this can be used to provide higher quality systems and services at a lower cost. I'll use Norm and Josh as examples.*
 - BACnet troubleshooting for everyone (not just for experts)
 - Speed up troubleshooting with industry-expert diagnostic checks
 - Comprehensive health reports
 - Ask to ALC: integrate VB into WebCTRL
- [10 mins] The Internet of Things is an opportunity for additional revenue
 - Health monitoring of multi-vendor building operation systems (BAS+)
 - Become the Multi-service Building Network platform (master integrator)
 - Cybersecurity audits and services
- [3 mins] Summary & closing
